

[Water Solutions]

[In Africa, water is a scarce and valuable resource. With over 30 years of experience, Robor delivers flexible, efficient and customised steel pipe solutions and products to the water industry.]

Our innovative technology ensures superior water pipeline performance even in the harshest of environments. In addition, Robor offers a variety of value added steel pipe and complete piping systems perfectly suited to the conveyance of water and sewerage. Our range includes but is not restricted to, lined, coated and uncoated steel pipe, ductile iron pipe, as well as fittings and jointing systems.

Value added services for complete water solutions include:

- Lining and coating
- Jointing systems
- Fire protection solutions
- Robotic and submerged arc welding facilities
- On-site services and training
- Technical support
