

[Reliability Beyond Borders]

[Based in South Africa, Robor's wealth of experience, world-class product offering and dynamic support capabilities ensure that we can deliver competitive, effective and robust steel pipe conveyance solutions, throughout Africa.]

Robor offers a diverse range of wear resistant products, tailored to meet the demands of handling the aggressive materials common in Africa's mines:

- HDPE lined Steel Polypipe
- External corrosion protection via Powercrete
- Flanged, shouldered and grooved systems in various materials
- Liners and body panels for shutes

Superior products, services and location give Robor the competitive edge:

- Logistical advantage
- 30 years' industry experience
- Innovative products and solutions
- Technical support
- Large stock holding

Across its divisions, Robor manufactures and supplies a comprehensive range of products and solutions to the mining industry. As a member of various South African and International organizations, Robor ensures that local and international requirements and benchmarks are met. Robor is also capable of providing a wide range of value added and light fabrication solutions ideally suited to the mining industry.

[Products

Hot Rolled Tube and Pipe suitable for:]

- Complete pipe systems for water conveyance, compressed air and hydro mining
- Hot rolled tube used in the manufacture of conveyor systems
- Hot rolled tube used as the input material for buntons and shaft guides
- Hot rolled tube for the manufacture of rock props
- A range of welded and seamless pipe used in high pressure applications
- Various other applications

[Products

Cold Rolled Profiles suitable for:]

- Light framed structures of mine buildings
- Palisade poles used for security fencing
- Conveyor structures
- Various other applications

[Products - Hot Rolled Sheet and Plate and Structural Profiles suitable for:]

- Shaft steel work
- Hard wearing resistant steel plate suitable for bucket lifts, mine scrapers, for housing, blasting screens, throat liners and mill backing plates
- Hot rolled structural profiles suitable for grizzly's
- Various other applications

Our products comply with the SANS SABS 62 and 657 standards
