Robor Draw Bench

Robor is pleased to announce the re-launch of the draw benches situated on the Elandsfontein site under the management of the Primary products team. The products produced through this process offer a range of unique profiles and a complimentary range to the off mill tubular products manufactured by Robor.

Attached is our latest 2018 draw bench Catalogue comprising of a comprehensive range of sizes, colour coded for ease of reference, along with our minimum order quantities. Drawn hollow steel sections and profiles are available in a variety of sizes, lengths and material grades. In addition to the products shown in the catalogue we have the capability to offer a wider range of sizes, to suit your particular needs, on request. The catalogue is also available on our Robor web site - http://www.robor.co.za/structural_steel_products

The full product range includes square, rectangular and round tubing, a variety of special closed profiles and in addition we can supply a range of rectangular and airflow buntons for the mining industry.

As always Robor products are produced to the highest quality standards and supported by our superior service and lead times. Technical back-up teams are available to discuss your individual requirements.
