

## [ The Structure of Quality ]

Robor's ISO 9001 and ISO 14000 certified divisions supply the building and construction industry with steel that meets the required quality standards.

**Products:**

**Cold Formed Steel Sections -**  
includes a full range of purlins, girts and standard and non-standard open sections.

**Structural Hollow Sections and Mechanical Tube -**  
includes a full range of Structural Hollow Sections and Mechanical Tube.

**Long Steel Structural Sections -**  
includes universal beams and columns, IPE sections, IPE AA sections, channels, bars and angles.

**Conveyance Pipe -**  
includes a range of welded and seamless pipe.

**Sheet and Plate -**  
includes a wide range of Sheet and Plate with or without value added services.

**Value Added Services:**

**Scaffolding -**  
includes the supply, erection and dismantle of access scaffolding on a contractual basis.

**Galvanizing -**  
Robor can galvanize structures of varying sizes to a high quality finish in accordance to various specifications.

**Other Value Added Services:**

- shot blasting and primer painting • profiling • decoiling • slitting
- bending • cutting to size and mitre cutting • notching • slotting
- bevelling • drilling • blasting • primer painting

Laser and profiling machines offer accurate, high quality cutting. Combined with a host of our other services perfected by years of experience, we offer the most comprehensive and customised solutions from one supplier.

**Structural Solutions**

Robor manufactures and supplies a range of products and solutions to the building and construction industry.

[ **Cold Rolled Formed Steel Profiles** ]

**Steel Grades**

SAE1008, SAE 1010, S235, S275, S355

**Products**

Purlins, girts, top hats, palisade pales and various others

**Some Applications**

Material suitable for:

- Structural steel buildings
- Various other applications

[ **Hot Rolled Steel Tube and Conveyance Pipe** ]

**Steel Grades**

SAE1008, SAE 1010, S235, S275, S355

**Products**

- Round CHS
- Squares SHS
- Rectangles RHS

**Some Applications**

Material suitable for:

- Support structures, fire protection, conveyance of water
- Various other applications

[ **Hot Rolled Steel Profiles** ]

**Steel Grades**

S235, S275, S355

**Products**

- Beams, columns, angles, channels, flats
- Square and round bar

**Some Applications**

Material suitable for:

- Support structures for steel buildings
- Various other applications

[ **Hot Rolled Sheet and Plate** ]

**Steel Grades**

SAE1008, SAE1010, S235, S275, S355,

**Products**

Hot rolled sheet and plate, "vastrap" plate

**Some Applications**

Material suitable for:

- Cladding and roof sheeting, walkways, base plates
- Various other applications

All steel sections mentioned can be galvanized or supplied as galvanized.

Our products comply with the SANS SABS 62 and 657 standards

[ **Scaffolding** ]

**Steel Grades**

S355

**Products**

Complete access scaffolding solutions, onsite erection and dismantling

**Some Applications**

Material suitable for:

- Access scaffolding
